SUBMISSION HIGHLIGHTS – ACTA ASTRONAUTICA (v30.0)

Manuscript Title: Transmedium Hypersonic Seawater MHD Vehicle Physics: Unified Applied Engineering Specification and Defensive Bounding Analysis
Author: Jacob James Rasmussen (ORCID: 0009-0009-7084-6523)

- Scale-invariant vehicle mass ledger achieving 100% budget closure (20,000 kg).
- Calibrated electrodeless AC MHD thrust curve to 110.0 kN peak at optimal s = 0.33.
- Verified electromagnetic skin depth delta = 0.15 m at 25 kHz RF induction frequency.
- Inverted Tsai-Wu yield stress coordinates to Quadrant III (-158.5, -110.0) MPa.
- Proven 3D FEA grid convergence index GCI = 0.42% and exponential ISS stability.
